Amendments to the Claims

- 13. (Currently amended) A manufacturing system for manufacturing integrated circuit devices comprising:
 - at least a first manufacturing machine;
 - a human interface device including:
 - at least a first station associated therewith;
 - at least a first display device located
 - adjacent said first station; and
 - at least a first scanning device located
 adjacent said first station;
- a first controller operatively connected to both said first display device and said first scanning device;
- a second controller operatively connected to said at least a first manufacturing machine; and
- a data link connecting said first controller and said second controller:
- at least a second station associated with said human
 interface device;
- at least a second display device located adjacent said at least a second station;
- at least a second scanning device located adjacent
 said second station;
- wherein said first controller is operatively attached to both said second display device and said second scanning device; and
- wherein said first display device indicates to a human user when to move an object from said first station to said second station.
- 14. (Original) The manufacturing system of claim 13 wherein said system comprises a photolithographic

S.N. 09/643,389 Art Unit 2125 Atty Dkt 10970997-3

integrated circuit manufacturing system.

15. (Original) The manufacturing system of claim 13 wherein said at least a first manufacturing machine comprises a wafer stepper machine.

16. (Cancelled)

17. (Currently amended) The manufacturing system of claim $\frac{16}{13}$ and further comprising:

at least a second manufacturing machine;

- a third controller operatively connected to said at least a second manufacturing machine; and
- a data link connecting said first controller and said third controller.
- 18. (Original) The manufacturing system of claim 17 wherein said second manufacturing machine is a resist spin track machine.
